

AUSTRALIAN GOVERNMENT BUREAU OF METEOROLOGY
TROPICAL CYCLONE WARNING CENTRE BRISBANE

TROPICAL CYCLONE FORECAST TRACK MAP
Ex-Tropical Cyclone Ului

Issued at 8:46 am EST Sunday 21 March 2010. Refer to Tropical Cyclone Advice Number 28.

Community Threat		Past Cyclone Details	
Warning Zone - Gales within 24 hours		Past Location and Intensity Number	
Watch Zone - Gales from 24 to 48 hours		Past Track and Movement	
Current Cyclone Details		Forecast Cyclone Details (at 24 and 48 hours from issue)	
Current Location and Intensity Number		Forecast Location and Intensity Number	
Very Destructive Winds		Very Destructive Wind Boundary	
Destructive Winds		Destructive Wind Boundary	
Strong Gale Force Winds		Strong Gale Force Wind Boundary	
		Most Likely Future Track	
		Range of Likely Tracks of Cyclone Centre	

The forecast path shown above is the Bureau’s best estimate of the cyclone’s future movement and intensity. There is always some uncertainty associated with tropical cyclone forecasting and the grey zone indicates the range of likely tracks of the cyclone centre.

Due to the uncertainty in the future movement, the indicated winds will almost certainly extend to regions outside the rings on this map. The extent of the warning and watch zones reflects this.

This product is designed for land-based communities; mariners should read the coastal waters and high seas warnings.

Remarks:

Ex-Tropical Cyclone Ului is located west of Collinsville, and continuing to move further inland. The cyclone has weakened rapidly, and is now below cyclone strength. DAMAGING winds are no longer expected. HEAVY RAINFALL and flooding are likely to continue about coastal and adjacent inland areas between Bowen and St Lawrence. A separate Severe Weather Warning is current for these conditions. DANGEROUS SURF conditions are expected to continue about exposed beaches south of the cyclone until later today. A separate Severe Weather Warning is current for these conditions.

- .For cyclone preparedness and safety advice, visit Queensland’s Disaster Management Services website [www.disaster.qld.gov.au].
- .For emergency assistance call the Queensland State Emergency Service [SES] on 132 500 [for assistance with storm damage, rising flood water, fallen trees on buildings or roof damage]
- .Report all power outages to Ergon Energy on 132 296

Name: Ex-Tropical Cyclone Ului

Details:

	Time (EST)	Intensity Category	Latitude (decimal deg.)	Longitude (decimal deg.)	Estimated Position Accuracy (km)
0hr	8 am March 21	tropical low	20.6S	147.3E	35
+6hr	2 pm March 21	tropical low	21.0S	145.8E	65
+12hr	8 pm March 21	tropical low	21.0S	144.5E	95
+18hr	2 am March 22	tropical low	20.8S	143.1E	120
+24hr	8 am March 22	tropical low	20.4S	141.5E	150
+36hr	8 pm March 22	tropical low	18.6S	138.0E	210
+48hr	8 am March 23	tropical low	17.4S	135.1E	270

There will be no further Forecast Track Maps issued by Brisbane TCWC for this system.
